# AIR MOUSE

with MotionSense

## MotionSense™ In-Air Control

Perfect for delivering presentations, playing media, and browsing the Internet in the air from anywhere

## Lightweight, compact, and portable

Ideal for mobile notebook users at home, in the office, or on the road

## Gyraton GyroTools Software

Initiate popular application commands through assignable in-air hand motions

## JUST BETTER TECHNOLOGY...

With Gyraton's intelligent Air Mouse featuring MotionSense, the world just got a little bit easier to navigate. No strings, no wires, no tricks, no gimmicks – just better technology allowing a more comfortable, portable mouse to operate in the air or on the desk. Take control of your applications with a flick of the wrist. You'll wonder how you ever did it any other way.

### ► EMPOWERING

Experience the patented MotionSense™ technology inside the Air Mouse that delivers precise in-air cursor control and convenience. Ideal for any desktop or notebook computer user, the Air Mouse features a sleek, stylish design that is comfortable to use yet compact and portable enough to be easily used at home, at the office, or on the road. The RF USB receiver fits neatly in the Air Mouse and both stow nicely in the included protective case for increased convenience when traveling.

### ► INTUITIVE

Use natural and comfortable wrist movements to take in-air control of your computer. Trigger activated MotionSense technology translates your hand movements into on screen cursor motion for in-air operation. On the desk, the Air Mouse uses the latest in laser sensor technology giving you precise, smooth, and flawless cursor tracking.

### ► FREEDOM

Unleash yourself from strain-inducing surfaces. Interference free 2.4 GHz RF allows you to take mouse control from up to 100 feet (30m) away with no line of sight restrictions. No need to worry about obstacles or obstructions, the Air Mouse truly works on the desk, in the air, anywhere you chose to roam for the ultimate freedom of movement

### ► REVOLUTIONARY

Take total control of your applications and initiate commands away from your computer with the flick of your wrist. A quick hand motion can control volume, or skip music tracks with multimedia players, or highlight important presentation points with a wave of your hand. With the three assignable Air Mouse buttons and included Gyraton software, application controls, features, and configurable functions are at your finger tips.

## HOW IT WORKS

The Gyraton Air Mouse is simple to use and easy to install. Just plug in the USB receiver into an available USB port, slide the Air Mouse switch to on, press the connect button on the USB receiver and Air Mouse, and your computer will automatically detect and configure the Air Mouse – there are no drivers to manually install. Place the Air Mouse on your desktop for use as a traditional mouse. Pick up the Air Mouse, press the activation trigger, and enjoy amazing in-air cursor control from in front of your computer or up to 100' feet away.
