

# BOOTH MASTER

## Interpretation Consoles

Distributed in Canada by Sennheiser (Canada), Inc.

The idea for the booth master console is from a Canadian technician who spends all his time with professional interpreters, and is the result of 10 years' experience with other interpretation consoles. The challenge consisted in coming out with cutting-edge features to make life easier for Canadian interpreters, while in conformity with Canadian national standard CAN/CGSB-131.2-M88.

### Balanced Inputs

- 2 Dynamic Microphone Inputs
- Floor : 0db
- Intercom compatible system

The gain structure setting protects the interpreter's ears from unpleasant, loud and peak noises without affecting sound quality. The complete, unique features in this analog console will meet the expectations of your interpreters and technician and you will have excellent job results.

### Balanced Outputs

- Out 1 0db, Out 2 0db
- Link through for other intercom systems
- Monitor will shut off automatically when you turn any channel ON

### Unique Features :

1. Flashing LED in Standby mode
2. Large language display
3. Mono or stereo headphones
4. Intercom compatible with your existing system
5. Ground lift on all inputs & outputs
6. Compressor limiter
7. Proudly made in Canada.
8. Demo unit available

For more information on recent installation please call your local representative to arrange for a live demo.
